## Trinh Ngoc Khanh

I can confirm that Trinh Ngoc Khanh graduated in December 2016 from Norwich Business School with a Masters degree in Investment and Financial Management.

Trinh was a superb student and in fact won the prize for the best performance in his cohort as well as a distinction in his degree. He achieved a weighted mean mark of 75.48% with superb performances across all his modules. In my module, he produced easily the best reflective essay I have ever marked in 20 years, with a mark of 92%.

I would highly recommend Trinh for a PhD programme. He is clearly a very bright student and has easily shown that he has what it takes (in terms of application and talent) to gain a PhD. His English is of a very high standard and he was a delight to deal with in his time at UEA.

Please do not hesitate to get in touch should you require any more information.
